

MENINGITIS WATCH ISSUED ON THE 12TH OF MARCH 2025.

Atmospheric conditions favorable for the outbreak of meningitis are in place over the country. Meningococcal meningitis is the most predominant Meningitis within the meningitis belt, and Nigeria falls under this belt.

March 2025 Meningitis Vigilance

The most vulnerable groups include infants, young children, the aged, those with weak immune systems and people with head injuries.

Safety protocols: Get vaccinated against meningitis, practice good hygiene by washing hands regularly and avoid close contact with those affected.

Relevant bodies responsible for public health should take note of this warning and take necessary preventive actions.

Residents are advised to stay informed through weather updates from NiMet. Visit our website www.nimet.gov.ng
