

WEEKLY WEATHER FORECAST BULLETIN NO: 202602004
ISSUED ON: 24TH FEBRUARY, 2026.
VALID: FROM 25TH FEBRUARY, 2026 TO 2ND MARCH, 2026.

REMARKS

During the week, the Madden-Julian Oscillation (MJO) signal is expected to stay weak over the West African region. However, with moisture influx and favourable 200hPa velocity potential anomaly, prospects of **Low to Moderate** rainfall are expected over parts Bayelsa and Rivers states, while **Low or no rainfall** is expected in the remaining parts of the country.

Advisory:

There are prospects of flash floods on roads, bridges & low-lying areas which can disrupt vehicular traffic. The public is advised to take necessary safety precautions; do not walk through fast-flowing runoff waters.
